

# SP-TP7

## Touch Panel Control System

The new SP Controls 7 inch Touchscreen controller provides a simple, affordable and easy to configure solution for presentation systems control. Using a bright, capacitive color display the unit responds instantly with the touch of a finger.

Using the quick and easy set-up and a configurable built-in GUI, makes the SP-TP7 a breeze to get up and running. Install the touchscreen unit with a required SP Controls NRC (Networked Room Controller) into all your presentation system installations. Update existing or older systems to touch control by replacing PixiePro control units in minutes. Seamlessly connects directly with existing or new SP Controls NRC units over standard category cabling or via your secure network.

Varied available mounting solutions for secure wall, equipment rack, tabletop or lectern, as well as legacy SmartBox+ replacement face-plates will provide a modern and streamlined look for conference and meeting rooms, classrooms, auditorium or multi-purpose presentation systems.

Take advantage of SP Controls' extensive driver library built from over 20 years of control product development. Remote access, management and control of AV in multiple rooms and buildings over the network is available by running SP Controls SmartView Web software on your system through SP Controls Networked Room Controllers.

- ▼ Beautifully designed with anodized brushed aluminum bezel.
- ▼ 10-point touch screen display.

- ▼ Control of multiple displays or rooms via single centralized touchscreen control.
- ▼ Power Over Ethernet using a single network cable (Optional POE adapter required).
